SUMMARY

Full Stack Developer Intern building production MERN applications, with two independently built platforms (SmartPrint, Village Connect) featuring JWT/RBAC security and scalable MongoDB design. Solved 200+ DSA problems and holds dual MongoDB certifications.

EDUCATION

SRM AP University B.Tech in Computer Science CGPA: 9.05/10	Amaravati, India 2024 – 2028
Pavitra CO-OP Junior College Intermediate – 91%	Machilipatnam 2022 – 2024
Sri Chaitanya School SSC – 573/600	Machilipatnam 2022

EXPERIENCE

Full Stack Developer Intern (MERN + Redux) <i>Agumentik Group of Companies</i>	May 2026 – Present Remote
- Built full-stack MERN application features using React, Redux, and Socket.io, contributing to sprint deliverables across a 4–5 member agile remote team. - Developed 10+ RESTful APIs using Node.js and Express.js while configuring JWT-based authentication with Role-Based Access Control (RBAC) for secure multi-role access. - Assisted in implementing CI/CD pipelines by automating build, testing, and deployment workflows to streamline software releases. - Collaborated daily within the 4–5 member cross-functional team, spanning Frontend, Backend, UI/UX, and QA, to maintain integration consistency across the shared codebase.	

SKILLS

Languages: C++, JavaScript, Python, C
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS
Web Development: React.js, Redux, Tailwind CSS, Node.js, Express.js, Socket.io
Databases: MongoDB, MySQL, Redis
DevOps & Tools: Docker, Kubernetes, Git, CI/CD, Postman
Machine Learning: scikit-learn, NumPy, Pandas (Supervised & Unsupervised Learning)

PROJECTS

SmartPrint – Full-Stack Print Queue Management System <i>React.js, Node.js, Express.js, MongoDB, Socket.io</i>	GitHub — Live
- Architected an event-driven print queue platform with Socket.io for real-time job updates, enabling concurrent multi-user task handling. - Engineered 10+ RESTful APIs for job submission, status polling, and queue prioritization with async request handling and clean client-server separation. - Enforced server-side file upload validation with type and size checks, eliminating invalid entries and backend errors at the API boundary. - Built an automated priority-based scheduling engine supporting concurrent print job execution and efficient queue management.	
Village Connect – Rural Services Platform <i>React.js, Node.js, MongoDB, JWT, RBAC, REST APIs</i>	GitHub — Live
- Built a scalable MERN platform connecting rural users with jobs, healthcare, agriculture, and government welfare services while supporting high-read concurrent workloads. - Implemented JWT authentication with RBAC, enabling secure differentiated access across user and admin roles with server-enforced authorization. - Structured normalized MongoDB schemas with compound indexing to optimize high-read, multi-role concurrent queries at scale. - Developed an admin dashboard with real-time monitoring, user management, and centralized service control for operational visibility.	

ACHIEVEMENTS & HACKATHONS

- Solved **200+ DSA problems** on LeetCode
- Selected for **the Smart India Hackathon** internal round among 100+ competing teams.
- Earned **MongoDB certifications** – Node.js Developer Path & Associate Developer. [\[Certificates\]](#)
- Won **Community Selected Award (Rs. 2500)** at VibeCraft Hackathon [\[View\]](#)
- Delivered a **Social Impact Project** at Code for Connection Hackathon. [\[View\]](#)

Positions: Technical Team Member – Google Developer Group (GDG) | Public Relations Member – College Sports Council
